Company Profile

Hardware export trading company · Founded 2009 · Fuzhou, Fujian, China

1. Who we are

Fuzhou Hangteng Hardware Co., Ltd. was founded in 2009 as a small trading office supplying fasteners to Southeast Asian importers. Today we coordinate production across six product families and ship to more than 40 markets in North America, Europe, the Middle East and Southeast Asia.

We are an export trading company, not a single factory: we work with an audited network of fastener, hardware and die casting factories in Fujian and Zhejiang. You get one contract, one document set and one named export coordinator from quotation through to the bill of lading, while production stays with the factory best tooled for your part.

Our team sits within an hour of the factories we use, so trial runs, sample pulls and packing issues are handled in person. We are deliberately product-focused rather than catalogue-driven: if a specification is not in our range, we engineer it with a partner factory and quote it properly instead of substituting something similar.

2. At a glance

US\$ 12M Annual export value	120+ Employees across partner sites	18,000 m² Workshop & warehouse area	40+ Countries served
6,000+ SKUs in catalogue	350+ Containers shipped per year	98.6% On-time shipment rate	15+ Partner factories audited

3. What we supply

- Fasteners — bolts, screws, nuts, washers, anchors
- Door & window hardware
- Furniture hardware
- Cabinet hardware
- Building hardware
- Hand tools & tool sets
- Power tool accessories
- Locks & security products
- Kitchen & bath hardware
- Zinc / aluminium die castings
- Rigging & lifting hardware
- Abrasives & grinding products

Standard and non-standard specifications; OEM / ODM programmes with customer-owned or new tooling; private-label and retail-ready packaging.

4. Main export markets

REGION	TYPICAL REQUIREMENTS WE SUPPORT	SHARE OF SHIPMENTS
North America	ANSI/ASME and SAE-listed fasteners, retail-ready hand tool programmes, DDP options to US east and west coast ports	26%
Europe	DIN/EN standards, CE and RoHS documentation, REACH-compliant coatings and packaging for EU distributors	34%
Middle East	High-corrosion specifications, hot dip galvanised building hardware, project-based supply for contractors	22%
Southeast Asia	Short transit times, JIS-standard fasteners, mixed-container consolidation	18%

5. Quality control — four checkpoints before your container leaves

STAGE	WHAT IS CHECKED
01 · Incoming material	Steel grade, wire rod and ingot certificates checked against the specification; chemical composition verified on sampled lots
02 · In-process controls	Dimensional checks at each operation (heading, threading, forming, casting) plus first-article approval for every production run
03 · Pre-shipment inspection	AQL sampling per ISO 2859-1, torque and hardness testing, salt-spray verification, full packing and labelling check
04 · Documentation & loading	Inspection report, packing list, commercial invoice and certificate of origin issued and matched to the container before sailing

Third-party inspection is welcome: your quality team or a nominated agency (SGS, BV, TÜV) can inspect the goods, the sample store and the loading bay; inspection is charged at the agency's published rate. Inspection records are filed against your PO number and available on request.

6. Compliance & documentation

- Material certificates — mill / heat certificates for steel, wire rod and ingot lots
- Inspection records — AQL, dimensional, torque, hardness and salt-spray results
- CE & RoHS documentation for EU-bound items, where applicable
- REACH statements covering plating, powder coating and passivation
- Certificate of origin, packing list, commercial invoice and B/L set
- Business licence and export licence copies for vendor onboarding

Where a market requires a specific certificate or accredited test report, we confirm what the producing factory can issue before you order.

7. Commercial terms — indicative

ITEM	STANDARD ARRANGEMENT
Typical MOQ	1,000 – 10,000 pcs or sets depending on the family (5,000 pcs for standard fasteners)
Stock samples	Free of charge; buyer covers courier cost
Custom samples	Charged, refundable against the first production order
Sample lead time	3 – 10 days depending on the family and finish
Production lead time	25 – 45 days with existing tooling; 45 – 60 days with new tooling
Payment	T/T 30% deposit, balance against B/L copy; L/C at sight accepted for qualified buyers
Incoterms	FOB Fuzhou / Xiamen / Ningbo, CIF / CFR to your port, DDP available for US and EU addresses
Consolidation	Mixed containers across product families, quoted as one shipment with one document set
